Professional Summary

Senior UI Developer with 10 years of experience building responsive web interfaces and front-end applications across healthcare, e-commerce, product-based, service-based, and startup environments. Skilled in HTML5, CSS3, JavaScript, Angular, Bootstrap, Tailwind CSS, jQuery, and responsive design. Experienced in converting Figma and PSD designs into pixel-perfect, scalable UI components and collaborating with cross-functional teams in Agile development workflows.

Work Experience:

- UI Developer with **10 years of experience** building responsive web interfaces for desktop, tablet, and mobile platforms.
- Developed responsive UI components using **HTML5, CSS3, JavaScript, Angular, jQuery, Bootstrap, Tailwind CSS, and SASS**.
- Converted **PSD and Figma designs into pixel-perfect, responsive HTML/CSS layouts** using reusable UI components.
- Built **HTML email templates** using table-based structures for cross-client compatibility.
- Designed and maintained responsive UI for enterprise web applications including **Admin Dashboards, PACS, and RCM** systems.
- Ensured **cross-browser compatibility** across Chrome, Internet Explorer 11, iPad, and mobile devices.
- Applied **UI/UX best practices, accessibility standards, and responsive design techniques** to improve user experience.
- Designed responsive UI components using **Kendo UI, PrimeNG, and AG-Grid**.
- Customized and maintained **WordPress themes and plugins** for business websites.
- Collaborated with **project managers, tech leads, and cross-functional teams** in Agile development environments.
- Used development tools including **Figma, Adobe Photoshop, Visual Studio Code, Git, Azure DevOps, Jira, and Asana**.
- Delivered UI solutions across **healthcare (HIPAA compliant), e-commerce, product-based, service-based, and startup environments**.

Project Experience:

Organization: Radamatic Solutions Pvt. Ltd.

28/05/2018 – 17/02/2026 | Pune

Role: UI Developer

- I held the responsibility for maintaining brand consistency and responsive design across Desktop, iPad, and Mobile devices for large-scale healthcare dashboards, including PACS, Insurance Billing systems and Two-Factor Authentication integrated with Duende Server.
- Translated high-fidelity Figma designs into modular, reusable UI components using Angular and Bootstrap 5, ensuring strict adherence to design specifications.
- Suggesting UI improvements to optimize the user journey before development began.
- Using Angular directives like (ng-repeat, ng-show/ng-hide, ng-if, ng-click) handled basic state updates to improve user interactivity.
